

Surge Buster®

TRANSPORTING AN **UNSTABLE** LIQUID CARGO LOAD POSES A VERY SERIOUS SAFETY HAZARD AND IS OFTEN CITED AS THE ROOT CAUSE OF NUMEROUS MOTOR VEHICLE ACCIDENTS AND FATALITIES.

WITH THE INTRODUCTION OF THE REVOLUTIONARY, NEW **SURGE BUSTER** SURGE CONTROL TECHNOLOGY, THERE IS NOW A COST EFFECTIVE WAY TO REDUCE THE LIABILITY AND SAFETY CONCERNS IN TRANSPORTING LIQUIDS.

EASY TO INSTALL THROUGH THE OPENING OF **ANY** TANK SIZE OR SHAPE, THE INNOVATIVE ELLIPSOID DESIGN OF THE **SURGE BUSTER** WORKS TO DEFLECT AND DISSIPATE AN ASTONISHING 96% OF THE SURGE (KINETIC ENERGY) IN ANY LIQUID LOAD. NOTHING IS ATTACHED TO THE TANK WALLS. THIS MEANS THERE IS LESS WEAR AND TEAR PLACED ON THE TANK MOUNTS, THE TRUCK FRAME, TIRES, BRAKES, TRANSMISSION AND DRIVE-LINE COMPONENTS. OPERATORS COMMONLY REPORT A 30 TO 40% REDUCTION IN VEHICLE MAINTENANCE COSTS. BY NOT HAVING TO CONSTANTLY REACT TO CONTROL THE SHIFTING WEIGHT OF A SURGING LOAD, DRIVERS BENEFIT TOO BY BEING LESS STRESSED AND FATIGUED.

- ◇ USE IN **HOT** OR **COLD** LIQUIDS
- ◇ CHEMICAL, FUEL, OR WATER CARGOES

STOP THE SURGE BEFORE IT STOPS YOU!

Surge Control, LLP has a Patent/Patent Pending on Surge Buster
